MARBLE

Marble is the most popular and best selling natural stones in the world. Many architects and designers worldwide utilized marble in their projects.

The different varieties, colours and textures available make marble a very attractive stone to use in design, as it has great potential to create an amazing visual effect in hotels, malls and other applications. Marble is available in polished, honed and leather finishes.

TRAVERTINE

Travertine is the most popular stone used in outdoor spaces due to its texture and high resistance to water. Travertine is available in filled, unfilled, polished or unpolished finishes; cross cut or vein cut.

TRA ONYX

Traonyx is the most rare and highly priced natural stone. It is commonly used for interior spaces such as hotels, receptions, bars and places of worship. The texture and transparency, which allows light to shine through, makes it a highly sought out material for architects to use in luxurious settings.
